Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: item nos 102(a), 103(a), 202(a) and 203(a). Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

3. Claims 1-24 are allowed.
4. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Art Unit: 1722

5. The following is an examiner's statement of reasons for allowance: The most relevant prior art of reference is that of U.S. Patent Application 10/864681. However, it does not teach nor fairly suggest singularly or in any combination thereof a method for forming a double density wordline, comprising: providing a semiconductor substrate; sequentially forming a poly layer, a first insulating layer, a first sacrificial layer, a second insulating layer, and a photoresist layer with a wordline pattern on the semiconductor substrate; sequentially etching the second insulating layer and the first sacrificial layer using the photoresist layer as an etching mask until the first insulating layer is exposed to form a first wordline mask, a second wordline mask, and an opening therebetween; removing the photoresist layer; forming a spacer on a sidewall of the opening; forming a second sacrificial layer in the opening; removing the spacer, the second insulating layer, and the first insulating layer under the spacer to form a third wordline mask composed of the second sacrificial layer and the first insulating layer thereunder; and etching the poly layer to form a first wordline, a second wordline, and a third wordline using the first wordline mask, the second wordline mask, and the third wordline mask as etching masks.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
